

ABSTRACT OF THE DISCLOSURE

A sauna cabin assembly system, for enabling the assembly of a front panel of a sauna cabin to each of a pair of side panels of the sauna cabin. The system is able to hide multiple securing elements for securing the front panel and each of the pair of side panels together. The system includes multiple front panel edge securing elements, and multiple side panel edge securing elements which are complementary to and interengageable with the multiple front panel edge securing elements. It enables the assembly of the sauna cabin front panel to each of the pair of sauna cabin side panels, so as to hide the multiple securing elements.
